Allen Hu

Proposal 1: Weather conditions affect what locations I'm going to go running.

<i>Data Set</i>	Sunny + Clear = Let's go for a run!/ Yellow Background
<i>Weather Condition + Cloud Overcast =</i>	Heavy Rain + Cloudy = Recommended to go on a treadmill!/ Blue Background
<i>Location of Running</i>	Snow Storm + Cloudy = Recommended to go on a treadmill!/ Blue Background
	Night + Clear = Time for some rest!/ Black Background

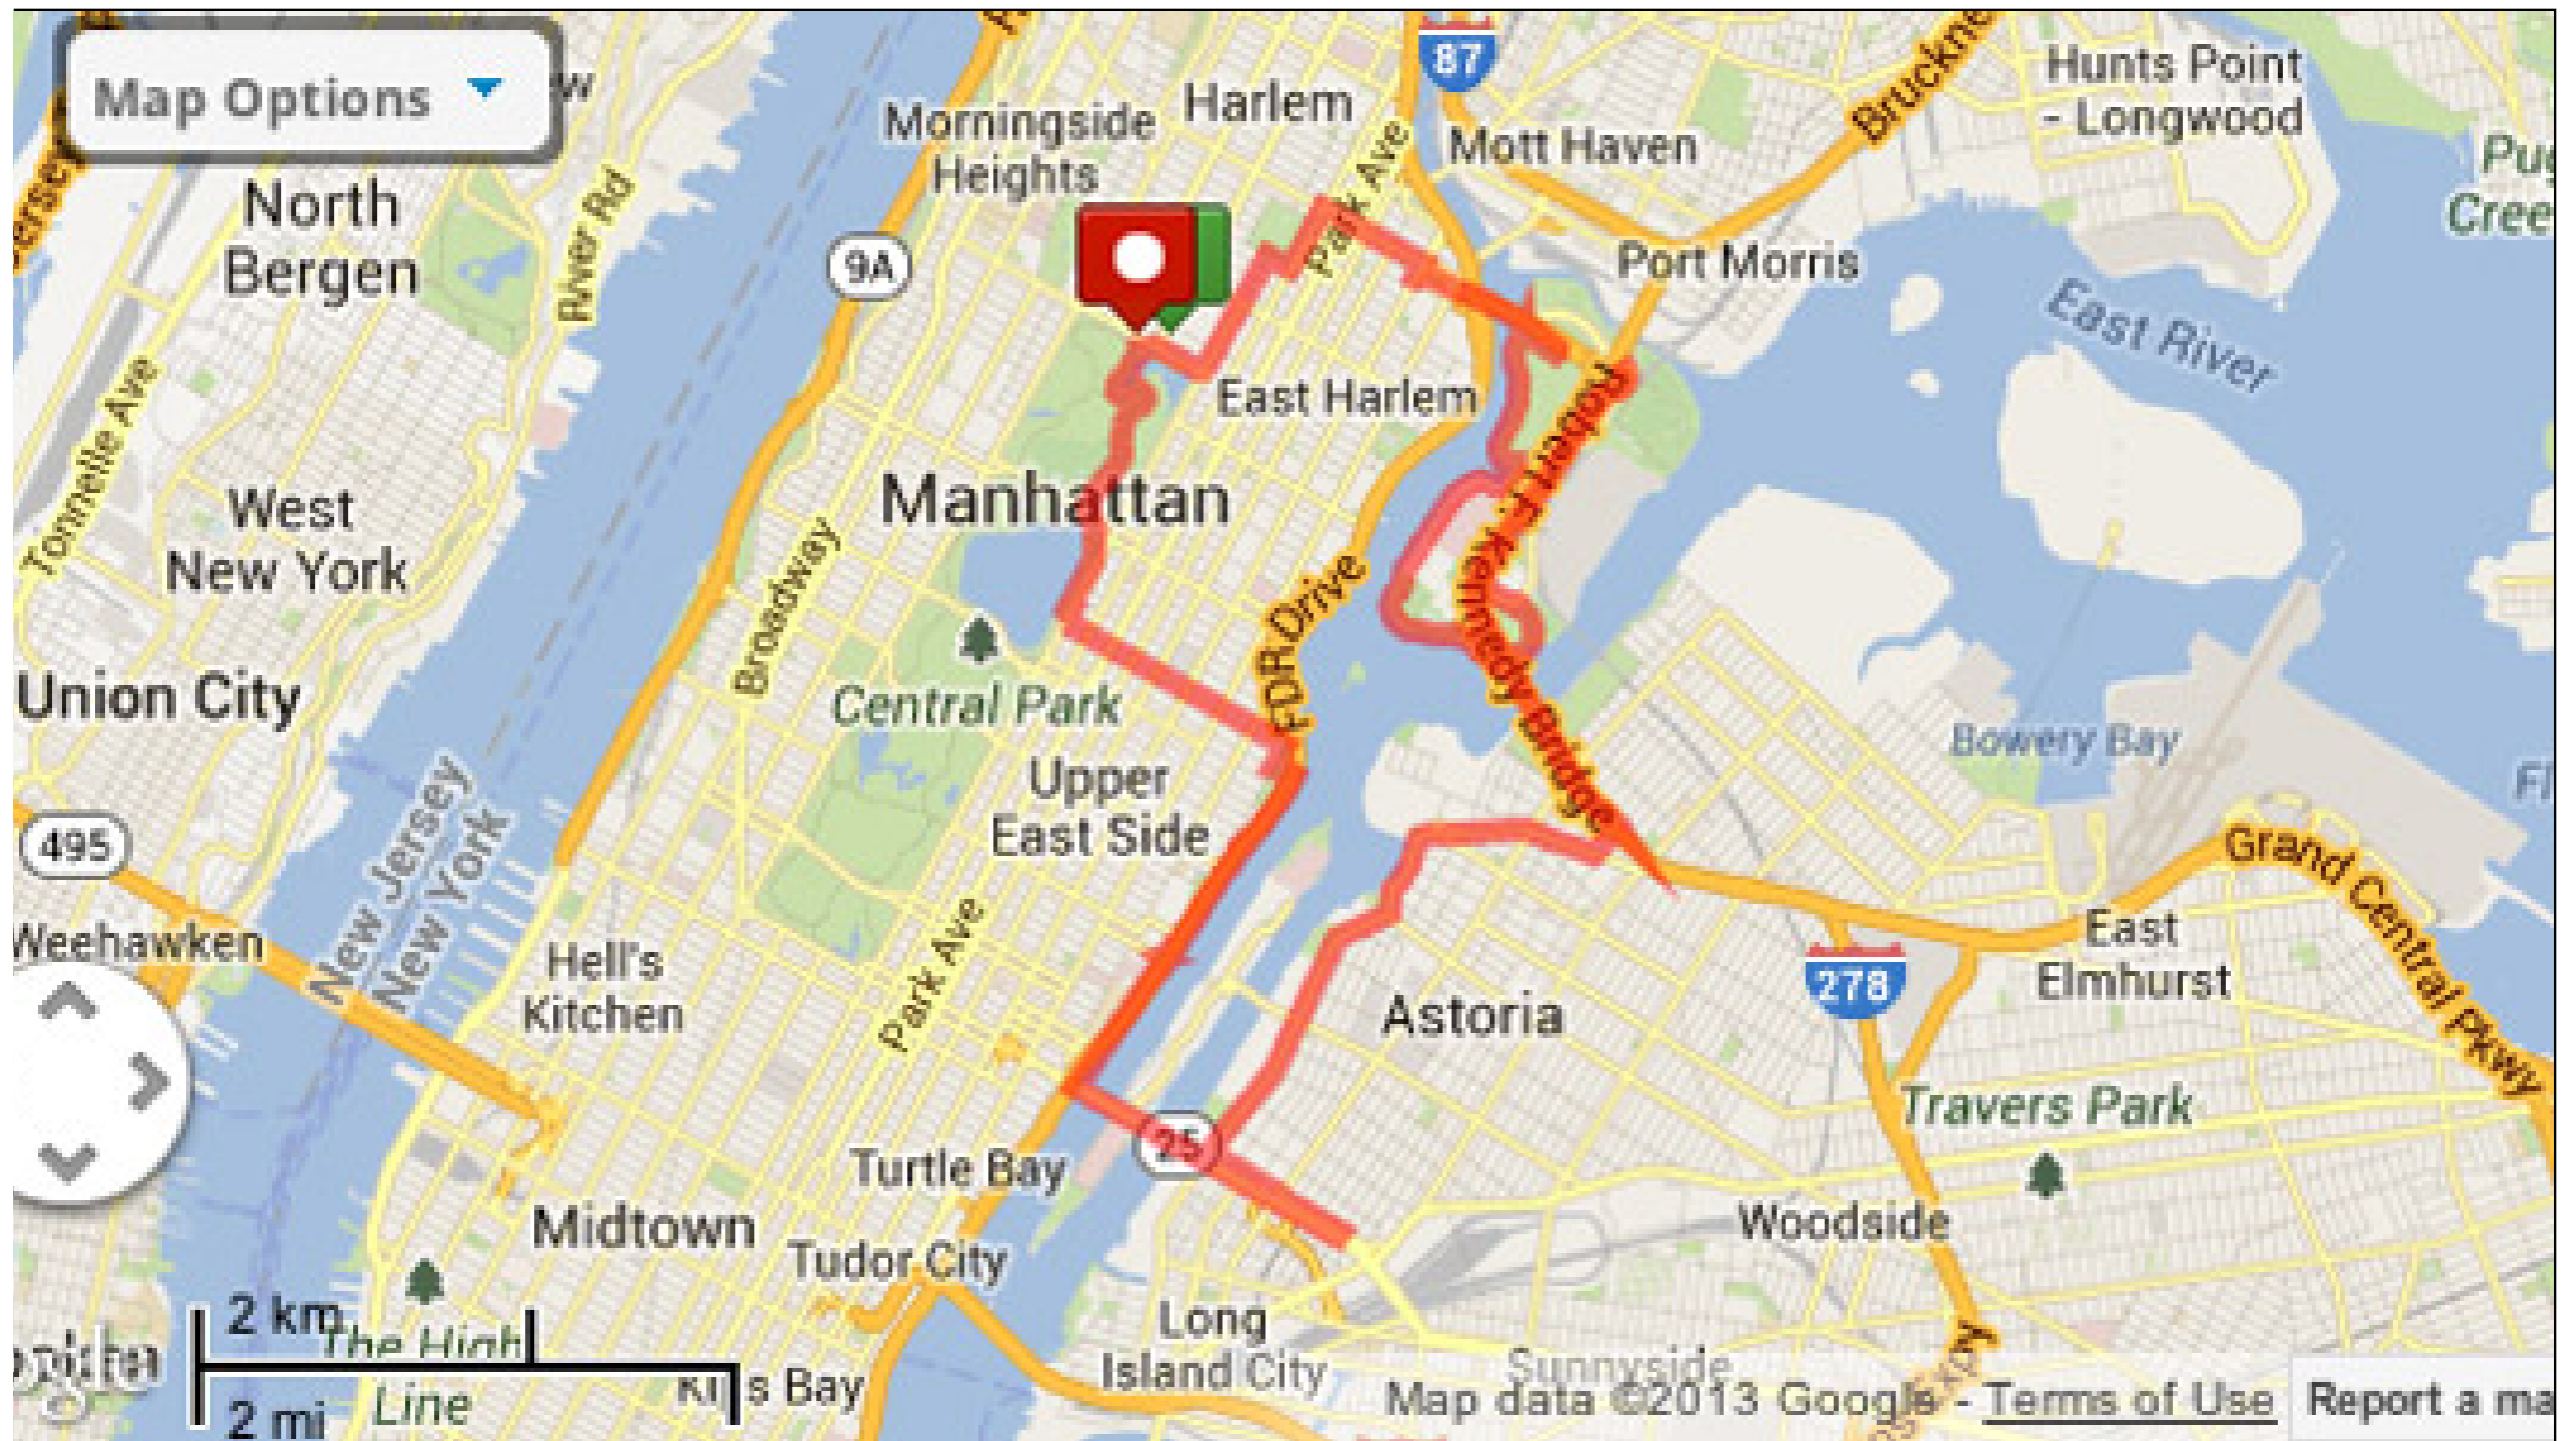

Direction 1: Inspiration page for new running routes

Sunny Day

Let's go for a run! **

Direction 1: Simple inspiration page for new running routes

Proposal 2: Webpage notifies about weather conditions and things not to forget.

Data Set

Rainy = Don't forget your umbrella today, its going to rain!

Weather Condition =

Snow = Don't forget your snowboots, its going to snow!

Item

Sunny = Don't forget some shades and a cap!

Little Rain = Just wear a jacket today there's going to be a bit of rain!

Direction 1: Simple illustrations with reminder.
